

## EXERCISE 9

02.11.2020

Create a table called EMP with the following structure.

NAME	TYPE
EMPNO	NUMBER (6)
ENAME	VARCHAR (20)
JOB	VARCHAR (10)
DEPTNO	NUMBER (3)
SAL	NUMBER (7,2)

Create DEPT table with the following structure.

Name	Type
DEPTNO	NUMBER (2)
DNAME	VARCHAR2(10)
LOC	VARCHAR2(10)

1. Create a procedure to display the details of an employee record from employee table for a given employee number.
2. Create a procedure to add details of a new employee into employee table
3. Write a procedure raise\_sal which increases the salary of an employee. It accepts an employee number and salary increase amount. It uses the employee number to find the current salary from the EMPLOYEE table and update the salary.
4. Create a procedure to delete a record from employee table for a given employee name.
5. Write a function to display minimum salary of employees from the employee table.
6. Write a function to display salary of an employee with the given employee number = 5.
7. Write a function average which takes DeptNo as input argument and returns the average salary received by the employee in the given department.
8. Write procedure that lists the highest salary drawn by an employee in each of the departments. It should make use of a named procedure dept\_highest which finds the highest salary drawn by an employee for the given department.
9. Write a function that will display the number of employees with salary more than 30000.
10. Write a function that will display the count of the number of employees working in Mumbai.
